<b>Office Action Summary</b>	<b>Application No.</b> 10/532,493	<b>Applicant(s)</b> MAGEL, HANS-CHRISTOPH
	<b>Examiner</b> Davis D. Hwu	<b>Art Unit</b> 3752

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED. (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

***Response to Amendment***

1. Applicant's amendment and arguments of July 16, 2007 and the IDS of September 26, 2007 have been entered.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 15-18, 21-23, and 26-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Klugl et al.

Klugl et al. show a fuel injection system comprising a fuel injection nozzle which can be supplied with fuel by a high pressure fuel source 9, the nozzle having a movable nozzle piston 6 for opening and closing injection openings 8, an injection nozzle high pressure chamber 34, and an injection nozzle control chamber 54, a pressure boosting device connected between the fuel injection nozzle and the fuel source 9, the pressure boosting device having a movable pressure booster piston 23, a pressure booster work chamber 22 and a pressure booster high pressure chamber 29, and a filling connection 31 which is open for filling the chamber 29 when the fuel injection nozzle is closed and is closed when the fuel injection nozzle is open, wherein closure of the filling connection is coupled with the motion of the nozzle piston 6 in the opening direction as recited, and wherein the filling connection is located between the chamber 29 and the control

chamber 54; wherein the connection 31 is closed by the nozzle piston 6 when the fuel injection nozzle is open as recited in claim 16.

***Claim Rejections - 35 USC § 103***

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
5. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Klugl et al. in view of Boecking.

Boecking teaches a fuel injection system comprising a pressure booster high pressure chamber 3 having a filling connection 39 including a throttle to provide adequate pressure build up in the chamber. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Klugl et al. by providing a throttle in the filling connection as taught by Boecking to provide adequate pressure build up in the chamber.

***Allowable Subject Matter***

6. Claims 24 and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-272-4904.
